

To playback

1. Open the app
2. In the top left hand corner press the menu icon 

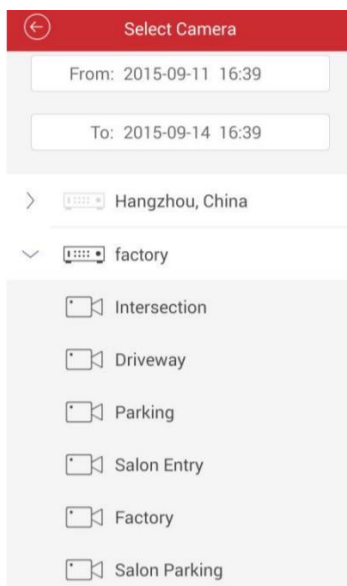

This will display the following menu

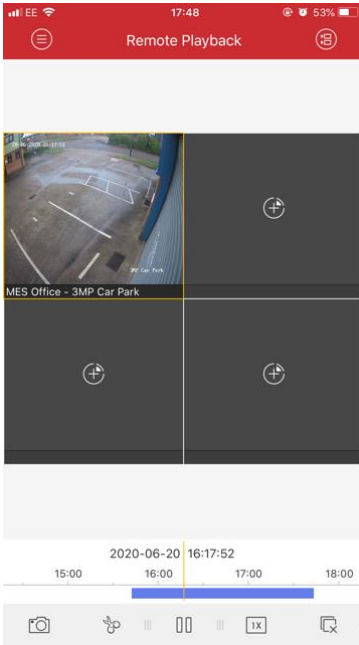

3. Press Remote playback then you will see a split screen containing these icons.

4. Select any of the above symbols and the next step will display

5. Set the From: date and time to the start date and time of the footage you wish to playback
6. Set the To: date and time to the end date and time of the footage you wish to playback
7. Once you are happy with steps 5 & 6 click on the blank white area in the middle of the screen which change the screen to show your system(s)
8. Press the dropdown icon for the relevant system then select the desired camera you wish to view in playback, this footage will then start to play
9. Once loaded there will be a blue bar displayed at the bottom of the page. To adjust the time you are playing back, press and drag the blue bar across the screen the release once you have selected the required time.

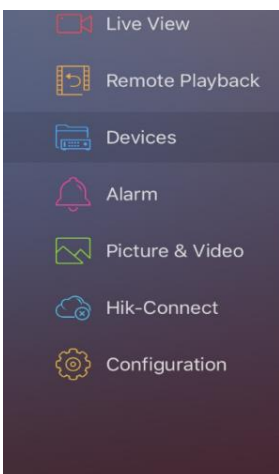

-You can also add additional cameras to playback by pressing the  and repeating steps 5-7 (you will only need to click the middle of the screen on step 7 as it will assume that).

-To make one of the images larger double tap the image. To resume to multi-screen double tap the image again.

To snip and save footage

- Once you have found your desired footage, you can then click the scissors icon which will then begin saving a recording of the footage to your device.
- Once you have recorded your desired footage you can click the scissors icon again to stop the recording.
- To take an image of the footage you can simple press the 'Camera' icon.

To access your recordings, please open the main menu and select 'Picture & Video'.
